Helpful Tips for Making 2010 Grant Applications

The following observations are intended to help those making application for 2009 Synergy grants:

1. Applications must make a clear request for a specific purpose and a specific amount of money (not just a general subsidy of operations or debt)
2. Sending many applications for different purposes does not increase the possibility of being given a grant (one or two clear proposals for something pivotal to the development of the church is much preferred)
3. Partnership grants are only for churches requesting a collaborative partnership with conference staff over a two-year period to develop areas of church health and mission
4. Applications must be received by the due date. The deadline for 2010 grants is 1st September, 2009
5. Please remember that due to the large number of applications many will not be successful – this is due to limited resources and the need to prioritize. It is not a judgement about the value of a church, ministry, or person

If you have any enquiries about making a 2010 application please contact David Tolman, John Crowther or Steve Smith on (02) 8719 2600 or check out the website: www.synergyproject.org.au
